

## 6-Month Sew In

We are super excited about this new service we have here at Seven Strands Hair Salon! Here are some things to know about the 6-Month Sew In.

[Book Now](#)

### INFORMATION:

What is the difference between the 6-Month Sew-In and a regular Sew-In? The length of time the install stays in, the braiding pattern to uphold the 6-Month install, and protection method that protects the hair from tension.

What is the benefit of the 6-Month Sew-In?

There are many benefits with the 6-Month Sew-In. A couple of benefits include 2-6 inches of hair growth; minimal excess shedding and breakage due to the foundation and take down process by the professional; and you naturally lose hair when it is exposed so having 90% of your hair put away will produce length growth and retention.

I highly recommend this service! You can change out the bundles, colors, even use the foundation with a wig! This gives you versatility with one braided foundation for 6 months! While continuously creating blood flow which invokes hair growth!

### INSTALLATION:

The 6-Month Sew in is a low maintenance style that invokes hair growth during the 6-month duration. The timeline for the service is:

1. The initial installation (5-6 hour)
2. 3-Week Maintenance
3. 6-Week Maintenance
4. 3 Month Retightening
5. 6 Month Removal

### WHAT'S THE NEXT STEPS?
